

IN THE SPECIFICATION:

On page 9, lines 8-18, please amend the paragraph to read as follows:

The horizontal anchors, 20 are attached to the back wall of bathtub by means of suction cups 24. The suction cups are preferably secured to the end pieces, 22, of the horizontal anchor by a pivotable connections, ~~38~~. As shown, the protuberance 38a 38A, formed of the resilient material of the suction cup, is inserted through opening 38b 38B in the end piece of horizontal anchor. The pivotable connection, ~~38~~ 38A and 38B prevents stresses applied to the horizontal anchor to be absorbed in the pivotable connection, decreasing the stresses applied to the suction cups 24, to maintain a firm attachment to the back wall of the bathtub.
